## RESUME

### EDUCATION

|                                                         |           |           |
|---------------------------------------------------------|-----------|-----------|
| B.Tech(AI&DS) - Sri Eshwar College of Engineering       | CGPA:7.95 | 2024-2028 |
| SSLC – Govt.Boys.Higher Secondary School                | 79.2%     | 2021-2022 |
| HSC – Sowdambikaa Matriculation Higher Secondary School | 86.2%     | 2022-2024 |

### PROJECT 1: AI-POWERED TARIFF IMPORT IMPACT SYSTEM

AI-Powered Tariff Import Impact Simulator is a full-stack web application developed using the MERN stack (MongoDB, Express.js, React.js, and Node.js) to analyze and simulate the impact of import tariffs on business operations. The system enables users to input tariff rates and import-related data, generating detailed analyses of potential effects on product costs, revenue, profitability, and overall business risk. Interactive dashboards and data visualizations were implemented to help users understand tariff impacts effectively, while MongoDB was used to store simulation records and historical analysis data for future reference.

### PROJECT 2: CONTACT NOTEBOOK

Used SQLite for persistent storage and structured contact data management.

Designed a clean and colorful GUI using Tkinter, with an emphasis on usability and functionality.

Real-time name suggestions, calendar-based birthday tracking with reminders, email sending via SMTP, night mode toggle, and a dynamic UI.

GUI application development, local database integration, user-centric feature planning, and modular Python architecture.

### PROJECT 3: REAL TIME EVENT SCHEDULER

Created a responsive web application for collaborative event planning and scheduling in real time.

Shared calendars, live availability checks, event chat, smart conflict detection, and automated email invites.

Enabled real-time updates with Firestore, user authentication, and scalable cloud functions.

Built a responsive UI with React, optimized for both desktop and mobile browsers.

Full-stack web development, real-time data handling, team productivity solutions, and modern front-end architecture.

### INTERNSHIP

Algotutor

Completed a MERN Full Stack Development Internship at AlgoTutor Academy, gaining practical knowledge and hands-on experience in full-stack web development using MongoDB, Express.js, React.js, and Node.js.

Participated in real-time project development, worked on frontend-backend integration, developed an understanding of REST APIs and database management, and gained exposure to modern web development practices and application workflows.

### CERTIFICATIONS:

|                                                                  |      |
|------------------------------------------------------------------|------|
| Introduction to C   Sololearn                                    | 2025 |
| Completion of C++ Training                                       | 2025 |
| Mastering Data Structures and Algorithms using C and C++   Udemy | 2025 |
| Mernstack,Java Oracle,Design Thinking-Nptel                      | 2025 |

CODING PROFILES LEETCODE : 150+ problem Solved

SKILLRACK : Solved 580+ problems

HACKERANK:Started to Solving

### SKILLS

Programming - C | C++(learning) | Python(learning)

Core Concepts – Data Structures

Web Technologies - HTML | CSS | JavaScript

Tools - VSCode | Canva | Excel | PowerPoint | Jupyter Notebook | GitHub | Git | Replit | Codeblocks
